radicals, Metals, Reduction (Chemistry).

The redox enzymes have been found to contain Zn
or can contain admixtures of other metals, and also
that metal ions make it possible for radicals to re-
combine. It is concluded that metal ions are essential
to the inhibition of enzymes by free radicals. This
research shows that the investigated inhibitors being

The present study is concerned with linearization, when
the stability of the solutions of certain distributed sys-
tems, which are described by differential equations
with lagging arguments, is being investigated. We also
consider equations involving partial derivatives which
are related to systems of automatic regulation with
uniformly distributed elements (lags, pipe-lines fric-
